UI/UX PROJECTS

E-Waste Recycling App

ONGOING

- UX Case Study & App Design in Figma
- Designed an intuitive interface to schedule pickups, view pickup status, and educate users about e-waste.
- UX Focus: Human-centered design, map UI, CTAs, icon use, color palette testing

Clothing App for Luxury brands

2025 APRIL

- Developed a sleek mobile app that showcases luxury clothing collections with category filtering, product previews, and modern UI layouts tailored for a high-end fashion audience.
- Tools: Kotlin, Android Studio, Android XML
- UX Work: Clean interface design, brand-focused color palette, intuitive shopping flow

Cancer Support App

2025March

- Created a mobile app UI focused on supporting cancer patients through features like symptom tracking, appointment reminders, emotional wellness tips.
- Tools: Figma
- UX Work: Empathetic user flow design, accessibility-focused layout, soft visuals, wireframing, and prototyping

TECHNICAL PROJECTS (FULL-STACK & DEV)

SaloGame (Group Project)

2025 JAN -JUNE

- A full-stack web application for gaming centers that allows users to register, book gaming PCs, join events, subscribe to memberships, and view real-time leaderboards.Includes secure Firebase authentication with email verification and role-based access for admins and customers.
- Technologies - React.js , TypeScript , Tailwind CSS , Node.js , Express.js , MongoDB , Firebase , Google Analytics

Sociopedia (Individual Project)

2024 DEC-JAN

- A dynamic social media platform where users can connect, share posts, and engage with others in real time. Built as a full-stack MERN application with Vite for fast and efficient development.
- Technologies: React, Vite, Material-UI, Node.js, Express.js, MongoDB, Mongoose, JWT (JSON Web Tokens), Cloudinary

Melody Mart (Group Project)

2024 SEP

- Developed a dynamic project to support music enthusiasts and professionals. Features include music streaming, studio room booking, e-commerce for instruments and merchandise, and artist tour/event management
- Technologies: ava, Servlets, MySQL, Apache Tomcat, HTML/CSS/JavaScript

Automated Parking System

2024 JAN-JUNE

- An intelligent parking system that automates space allocation, enables users to reserve spots, and provides real-time availability tracking.
- Technologies - HTML, CSS, PHP, Java Script
